The Honorable Sam Graves  
Chairman  
Committee on Transportation and Infrastructure  
2165 Rayburn House Office Building  
Washington, DC 20515

The Honorable Rick Larsen  
Ranking Member  
Committee on Transportation and Infrastructure  
2165 Rayburn House Office Building  
Washington, DC 20515

Dear Chairman Graves and Ranking Member Larsen:

As America's trusted global infrastructure leader, AECOM is pleased to convey its support for *The BUILD America 250 Act*. This bipartisan legislation would provide essential investments in our nation's roads, bridges, transit systems, railroads, and transportation safety programs. It was a pleasure meeting with you in Washington, DC earlier this month to discuss this legislation, and we applaud your leadership in finalizing the surface bill to bring certainty and stability to America's major transportation infrastructure programs, while encouraging innovation to improve project delivery.

We are particularly pleased to see the bill's increased investments that will sustain the momentum of recent years, providing certainty to state and local governments as they advance their own investments in infrastructure. In addition, we appreciate your inclusion of alternate funding approaches to stabilizing the Highway Trust Fund, maintaining the user-based revenue connection, and ensuring reduced reliance on general fund transfers.

The BUILD America 250 Act's investments in our nation's critical transportation infrastructure systems come at a time when Artificial Intelligence is revolutionizing the way projects are planned, designed and delivered. These innovations have the potential to radically improve cost, time, and efficiency parameters, saving taxpayer dollars while producing a better, faster result. We continue to believe that owners and operators of our nation's infrastructure assets should expand the use of advanced digital technologies like AI and should incentivize contractors to use these tools to be more efficient. To that end, we are excited by the inclusion of provisions encouraging recipients of federal funds to utilize modern contracting processes that reward innovation and leverage the latest 3D modeling technologies in planning and environmental work.

Thank you again for your leadership in advancing the BUILD America 250 Act. We stand ready to support your efforts in reauthorizing these essential programs.

Sincerely,

W. Troy Rudd  
Chairman and Chief Executive Officer  
AECOM
