Washington, DC 20510

Dear Chair Graves, Chair Cantwell, Ranking Member Larsen, Ranking Member Cruz, Chair Graves, Chair Duckworth, Ranking Member Cohen, and Ranking Member Moran:

On behalf of DroneUp, one of the country's leading drone package delivery providers, we would like to convey our strong support for the recently released House Transportation and Infrastructure and Senate Commerce Science and Transportation Committees Federal Aviation Administration (FAA) Reauthorization. Your strong focus on the drone industry, and addressing issues critical to its future growth and success is very much noticed and appreciated.

As DroneUp continues to expand its services across the country, the legislation will have a profound impact on our ability to expand operations. Beyond visual line of sight operations, use of a risk-based approach on transport of hazardous materials, and improvement in environmental review and noise certification are just a handful of the very forward-looking policies that will have a significant impact on DroneUp, and the industry's, ability to provide this societal and economic changing service to more Americans.

As the bill moves through its final stages of consideration and enactment, please do not hesitate to reach out should there be areas or issues we could be of help with. Thank you, again, for your incredible work on behalf of the drone industry and the American people, who will benefit so greatly.

Sincerely,

Anthony Vittone
Chief Operating Officer
DroneUp
