

"The FAA Managers Association is strongly supportive of H.R. 6086, the Aviation Funding Solvency Act. For much too long, our air traffic community has been used as pawns in the seemingly annual federal government shutdown showdowns. The financial and emotional toll each of these shutdowns has had on our air traffic managers and supervisors cannot be overstated. By utilizing an existing funding mechanism, this legislation would help ensure that such a situation never happens again. We loudly applaud Chairman Graves, Ranking Member Larsen, and the entire House Transportation & Infrastructure Committee for their invaluable leadership on this effort and encourage swift passage of this vital bill."

- Mike Smith, President, FAA Managers Association
