

## NetJets Statement

“NetJets supports the T&I Committee’s commitment to securing a stable funding mechanism for the dedicated professionals who manage our national airspace system. Ensuring controllers and other aviation safety personnel are paid without disruption during a lapse in government funding would allow them to remain focused on their safety-critical responsibilities, directly supporting the safe and efficient operation of the national airspace system. We applaud T&I Committee Chairman Sam Graves, Ranking Member Rick Larsen, Aviation Subcommittee Chairman Troy Nehls, and Aviation Subcommittee Ranking Member André Carson for working in a bipartisan fashion to protect the continuity of critical aviation services.”
