Representative Graves
1135 Longworth HOB
Washington, DC 20515

Dear Honorable Chairman Graves,

I am writing to express our support for the upcoming bill to help address ATC modernization.

The \$15 billion will be included for addressing air traffic staffing, infrastructure, and technology issues goes a long way to addressing many of the current shortcomings within our ATC infrastructure. Being a pilot like yourself, we understand the need for a strong ATC organization and a significant leap in the technology that is deployed to support it.

We here at Hartzell appreciate your leadership and support on the T&I committee. Looking forward to another great Hill Day with GAMA.

Thank you,

Keith Bagley
President, Hartzell Engine Tech
