The Honorable Sam Graves
Chairman
Committee on Transportation &
Infrastructure
U.S. House of Representatives
Washington, D.C. 20515

The Honorable Rick Larsen
Ranking Member
Committee on Transportation &
Infrastructure
U.S. House of Representatives
Washington, D.C. 20515

Dear Chairman Graves, Ranking Member Larsen, and Members of the Committee:

RTX (Collins Aerospace, Pratt & Whitney, Raytheon) strongly endorses the Air Traffic Control modernization proposal from the House Transportation and Infrastructure Committee and applaud the swift action taken to fund critical investments in the air traffic control system's technology, infrastructure, and workforce.

As a long-term incumbent and provider of FAA systems and technologies, we understand the importance of how these systems contribute to a functional, safe national airspace system (NAS). We appreciate the tireless work of Chairman Graves and the members of the committee to address aging infrastructure and gaps in the current NAS, as well as provide investments to ensure the FAA's workforce is able to attract and retain top-tier talent. This investment builds upon the work of the committee in the passage of the 2024 FAA authorization bill.

We urge the House to include and retain these provisions in a final bill and we will continue to communicate the criticality of this investment with members in both the House and Senate.
