

DEPARTMENT OF THE ARMY
OFFICE OF THE ASSISTANT SECRETARY
CIVIL WORKS
108 ARMY PENTAGON
WASHINGTON DC 20310-0108

SEP 11 2026

The Honorable Sam Graves
Chairman
Committee on Transportation and Infrastructure
United States House of Representatives
Washington, DC 20515

Dear Mr. Chairman:

In accordance with Section 203 of the Water Resources Development Act of 1986, as amended, I am responsible for determining whether the Sabine Neches Navigation District's (SNND), Section 203, Feasibility Report and Environmental Assessment (June 2026), and the process under which the study was developed, comply with Federal laws and regulations. In addition, I must submit a report to Congress that describes the results of my review, including a determination of whether the SNND's recommended project is feasible; any recommendations I may have concerning the recommended plan; and any conditions that I may require for construction of the proposed project.

After a thorough policy review, I have determined that the SNND's recommended plan is feasible and complies with applicable Federal laws and regulations. While there are no concerns with the current plan or design of the project, further design and construction shall continue to follow all relevant policies and procedures governing implementation of water resources development projects undertaken by the U.S. Army Corps of Engineers.

The Office of Management and Budget (OMB) advises that the project is consistent with the policy and programs of the President. A copy of OMB's letter, dated August 28, 2026, is enclosed. I am sending an identical letter to Ranking Member Larsen and the Senate Committee on Environment and Public Works.

Sincerely,

For. D. Lee Forz

Adam R. Telle
