The Honorable Sam Graves
Chairman
House Committee on Transportation & Infrastructure
Committee
2165 Rayburn House Office Building
Washington, D.C. 20515

The Honorable Rick Larsen
Ranking Member
House Committee on Transportation & Infrastructure
Committee
2165 Rayburn House Office Building
Washington, D.C. 20515

Dear Chairman Graves and Ranking Member Larsen:

Thank you for your unwavering commitment to ensuring the safety of our nation's aviation system. I write today to convey our support for the U.S. House of Representatives reconciliation package to address air traffic staffing, infrastructure, and technology issues, etc.

A robust aviation ecosystem starts with utilization of the best innovation and technology the United States has to offer. Recent incidents within the U.S. National Airspace System have showcased the strain and challenges on our air traffic control system. The utilization of additional government funding for refurbishment, technology upgrades, and the hiring of additional air traffic controllers, among additional initiatives, allows the United States to uphold its position as the "gold standard" of safe air travel.

This investment is timely and necessary to maintain America's leadership in air travel safety. Skyryse also looks forward to working with the Committee on initiatives to reduce the burden on our air traffic system, including supporting technologies that reduce the cognitive load on pilots thus reducing in-flight emergencies and the strain those place on our air traffic system.

At Skyryse, we are solely dedicated to advancing aviation safety, and we stand ready to work with the Committee to ensure the United States remains the gold standard of safe air travel.

Sincerely,

/s/ Howard Kass
