The Honorable Sam Graves  
Chairman  
Committee on Transportation and  
Infrastructure  
U.S. House of Representatives  
2165 Rayburn House Office Building  
Washington, D.C. 20515

The Honorable Rick Larsen  
Ranking Member  
Committee on Transportation and  
Infrastructure  
U.S. House of Representatives  
2163 Rayburn House Office Building  
Washington, D.C. 20515

*Re: BUILD America 250 Act*

Dear Chairman Graves and Ranking Member Larsen:

On behalf of TechNet, I write to congratulate you and your colleagues on the House Committee on Transportation and Infrastructure on releasing a bipartisan surface transportation reauthorization bill, the *BUILD America 250 Act*. We appreciate the Committee's leadership in advancing legislation that supports innovation, strengthens U.S. competitiveness, and modernizes the nation's transportation infrastructure.

TechNet is the national, bipartisan network of technology CEOs and senior executives that promotes the growth of the innovation economy by advocating a targeted policy agenda at the federal and 50-state level. TechNet's diverse membership includes over 100 dynamic American businesses ranging from startups to the most iconic companies on the planet and represents over five million employees and countless customers in the fields of information technology, artificial intelligence, e-commerce, the sharing and gig economies, advanced energy, cybersecurity, venture capital, and finance.

We appreciate and strongly support the inclusion of provisions from Congressman Vince Fong's H.R. 4661, *America Drives Act*. Commercial autonomous vehicle technologies have the potential to improve roadway safety, strengthen supply chain resilience, increase freight efficiency, and expand economic opportunity across the country. Establishing a clear, uniform federal framework for autonomous vehicle deployment is critical to ensuring the United States remains a global leader in transportation innovation.

As the Committee recognized, by including Congressman Fong's legislation, autonomous vehicle technologies can play an important role in addressing longstanding freight and workforce challenges while improving the movement of goods throughout the economy. The safe commercial deployment of these technologies has the potential to enhance logistics efficiency, reduce operational disruptions, and support a more resilient transportation network. Continued policy

leadership from Congress is essential to enabling innovation while maintaining strong safety standards.

Thank you for your leadership on surface transportation reauthorization and for your continued work to advance policies that support innovation and economic growth. We look forward to continuing to work with the Committee on these important issues.

Sincerely,
