

STATEMENT FROM AMERICAN AIRLINES ON ATC MODERNIZATION EFFORTS

"The U.S. air traffic control system's technology and infrastructure have fallen behind much of the world. American Airlines commends Chairman Graves for his proposal to provide much needed funding to bolster and modernize our air traffic control system. As President Trump and Secretary Duffy urgently work on a plan to build a state-of-the-art air traffic control system, this proposal is an essential first step in making aviation even safer and more efficient. We urge Congress to move swiftly to pass the proposal."
